

Digital ADAS

The Red Digital ADAS kit is compatible with our ServicePad and selected partner tools, and includes everything you need to get started with ADAS camera, radar and lidar calibrations.. Displaying all supported European car manufactures on a large 65" monitor, with intelligent display technology reduces setup time. The ideal solution for busy body shops with a large turnover of vehicles, it also ensures you can comply with the Thatcham Code of Practise, while reducing your key to key times.

The system can also be expanded with optional reflectors and mats to cover, night vision, 360 degree. and rear radar calibrations. Simple to use software with guide you through setting up the car and frame and also, how to make any necessary adjustments to calibrate the car.

- Simple to set up with one technician in less than 5 minutes
- Industry approved with full audit trail
- Always up to date - simply download new targets as they are released
- Use less workshop space
- No target panels to store or damage
- Patented technology aligns the image to the car.
- Use in any light conditions with 4K monitor.

The Digital ADAS kit includes :

- 65" monitor mounted on an adjustable frame
- All available front camera boards included
- Wi-Fi connectivity
- VCI
- 2 adjustable wheel clamps with spirit levels and reflectors
- Frame mounted laser for fast accurate set up
- Front laser reflector panel included as standard

Optional add on—Dealer on Demand

Dealer on Demand is our unique - simple to use remote service

using a 'black box' providing full diagnostics and programming functions for any car. Ideal for use in body shops where you can reduce key to key times and the amount of car movements to main dealers for diagnostics related tasks. The device can be plugged into any standard 16 pin OBD port and our remote operator connects to the car and uses the appropriate diagnostics tool to complete the required function e.g. health check, program new components, ADAS, SRS etc. The service can also be used if your diagnostics tool does not have the cover required.

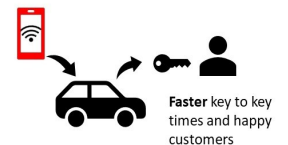

Remote operator using the correct software for the job.

- Services include
- ✓ New camera or radar programming
 - ✓ Headlight programming
 - ✓ SRS reset
 - ✓ ADAS
 - ✓ Read and Clear with report

Save time, money and staff costs with no car movements

Supported manufacturers

Alfa Romeo, AUDI, BMW, Citroen, FIAT, Ford, Honda, Hyundai, Jeep, KIA, Mazda, Mercedes, MINI, Nissan, Opel, Peugeot, Renault, SEAT, Skoda, Smart, Subaru, Toyota, VW and Volvo
